

Accelerated/Honors/Advanced Placement Agreement

We understand that by enrolling in any Accelerated/Honors/Advanced Placement course we are committing to a yearlong course. We also understand that these courses require a workload that is rigorous, often requiring summer work, and that student success will be predicated on the student's ability to meet the following expectations:

- Read at or above grade level
- Be able to write clear, cohesive essays
- Be able to type and submit clean copies of work
- Be able to think and work independently
- Be able to participate actively in class through careful and consistent preparation, complete note taking, and thoughtful participation in class discussions and activities
- Be able to complete an average of six hours of homework per class per week
- Be willing to make Accelerated/Honors/Advanced Placement course work an important priority.
- Attend class daily
- Complete all required summer assignments on time, with the understanding that these assignments count significantly toward the first semester grade

We also understand that we are committed to staying in the class for the full year. Students who are concerned about their academic performance are encouraged to seek tutorial assistance in order to succeed. Students will not be moved to another level without teacher, parent, and administrator agreement that the student is unable to complete the course. No changes will be considered until students have made every effort to be successful in the course. Students who drop the course will receive an F for the semester. Assignment to alternative courses is based on available space.

We have read the information above and agree that we will make the commitments necessary to succeed in Accelerated/Honors/Advanced Placement course selections.
